## Center for Sight Enhancement

# Low Vision Rehabilitation Services

*Improving  
daily living  
through  
better vision*

## Low Vision

*Persons living with low vision are impacted physically, emotionally and socially.*

*Each low vision rehabilitation program is individually prescribed to improve specific living, working, educational, and recreational activities.*

*Vision is enhanced through the use of optical and non-optical devices, specialized techniques, and training.*

## Low Vision Rehabilitation

*An optometrist will perform a comprehensive evaluation which will help you:*

- Understand your vision
- Use your vision more effectively
- Identify the appropriate devices

*Based on the individual's goals and the results of the comprehensive evaluation, a personalized rehabilitation plan will be created which will assist in areas such as:*

- Reading and writing
- Participating in social activities
- Performing leisure, work, home living and/or school activities
- Driving

## Assistive Technology

*On site technology using the newest devices such as:*

- Video magnifiers
- Bioptic telescopic spectacles
- Optical magnifiers
- Telescopes
- Lighting
- Visual field expanding lenses

*Driving Rehabilitation Training program may include:*

- Bioptic or hand-held telescope use
- Dynamic visual skills
- Activities of daily living
- Optical and non-optical devices and other adaptive equipment
- Patient and/or family education
